

Parle Tilak Vidyalaya Association's
MULUND COLLEGE OF COMMERCE (AUTONOMOUS)
T.Y. B.Sc. Information Technology
Semester V

Course: ASP.NET Core

Date: 16-12-2024

Duration: 40 min.

Max Marks: 20

Answer any four of the following:

20

1. How do package managers play a role in ASP.NET Core project development? Discuss how to manage packages in a project.
2. What is the role of catalog management in the administration of an ASP.NET Core application? How does managing orders interact with this feature?
3. How do you configure middleware in an ASP.NET Core application? Provide examples of common middleware components used in projects.
4. What are RESTful web services, and how do they differ from traditional web services? Explain their significance in modern application development
5. What are tag helpers, and how do they enhance the development experience in ASP.NET Core? Provide examples of common tag helpers.
6. Explain the importance of caching data and caching responses in ASP.NET Core applications. How do these techniques improve application performance?
