

Parle Tilak Vidyalyaya Association's
MULUND COLLEGE OF COMMERCE (AUTONOMOUS)
T.Y. B.Sc. Information Technology
Semester V

Course: Internet of Things

Date: 13-12-2024

Duration: 40 min.

Max Marks: 20

Answer any four of the following:

20

1. Explain the push-pull communication model.
2. Explain the fog based architecture of IoT. What are the advantages of fog computing?
3. What is Hardware assisted virtualization? Explain.
4. How IoT can be used for (i) Remote operations in construction (ii) Logistics supply in military (iii) Remote operations in construction?
5. Discuss the adoption of IoT in automation.
6. Explain how IoT can be used in the Avoid-Shift-Improve (ASI) framework proposed by the International Energy Agency (IEA) to improve transportation in a country.
